OBJECTIVE

Highly motivated and adaptable Full Stack Software Developer with hands-on experience in .NET Core, MySQL, React, Node.js, and Angular. Passionate about building scalable, high-performance applications and continuously evolving with modern technologies. Currently focused on integrating AI-driven solutions into full stack development workflows. A smart worker with a proactive mindset, committed to delivering innovative, efficient, and user-centric digital products that drive business growth.

EXPERIENCE

Software Developer

QwickSoft Solutions pvt ltd - T nagar, Chennai

Nov 2024 - Present

- Engineered scalable RESTful APIs using .NET Core and C#, ensuring secure and efficient data transactions across the platform
- Built dynamic, responsive UI components in Angular and TypeScript to enhance user experience
- Managed cloud infrastructure and deployment pipelines on AWS, secure data storage
- Clean code and a well-organized folder structure that is easy to understand.

PROJECTS

1. Modern Portfolio Website

Tech Stack: React, Tailwind CSS, Material UI, Redux, Framer Motion.

Description: Designed and developed a responsive, animated, and interactive portfolio website showcasing my full-stack development skills with a focus on modern UI/UX principles.

2. MealMate – Daily Food Expense Tracker

Tech Stack: React Native, Expo, Redux Toolkit, React Native Paper, Tailwind CSS

Description: MealMate is a smart food expense calculator app that simplifies daily and monthly meal cost tracking. Users can top-up their virtual wallet and monitor automatic deductions for meals provided over a selected time period, with full visibility into balance, total spent, and dues — all through a sleek, mobile-first interface.

3. Devtools Formatter

Tech Stack: React, Tailwind CSS, Material UI, Redux.

Description: DevTools Formatter is a responsive developer tool built with React, TypeScript, Material UI, Tailwind CSS, and Redux that formats code (JS, HTML, CSS) and visualizes JSON with syntax highlighting and live updates. It features theme toggling, real-time formatting, and a user-friendly interface for efficient debugging and code inspection.

4. SmartRenamer

Tech Stack: Electron.js, Node.js fs module, Tailwind CSS, HTML5, Javascript.

Description: SmartRenamer is a lightweight desktop app that helps users batch rename files with ease. It supports adding prefixes, suffixes, date/time stamps, and numbering to filenames.

Users can drag and drop folders, preview changes, and apply renaming instantly. It's ideal for developers, content creators, business professionals, and anyone managing bulk files. The app is offline-first, fast, and beautifully designed with a minimal interface.
